DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 8, 9, 12-13, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In “protected amino”, a protecting group against what? These are final products, so what is there to protect against? As there is no such thing as a universal protecting group, correct selection of a protecting group requires some knowledge of what is being protected against. Likewise for “protected hydroxy”. The traverse is unpersuasive. It is agreed that these terms are entirely conventional, and under most circumstances do not raise a problem. However, the response does not get at the specific problem raised. These are pharmaceuticals, and are used in pharmaceutically acceptable compositions, e.g. the compositions of claim 13. There is nothing to be protected against, but correct selection of a protecting group requires some knowledge of what is being protected against.

Claims 4-7, 10-11, 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
